a Coverage
Observed coverage
Nominal coverage 1 − α
Exactly calibrated
Certificate interval
Coefficient region
b Width (α = 0.05)
Median upper bound minus plug-in
Sharp certificate
Separate bound
Parametric bootstrap
Sample size N
c Bootstrap near a symmetry
Coverage of the bootstrap interval
α = 0.05, nominal 0.90
α = 0.2, nominal 0.60
N = 400
N = 3200
True rotation defect
d Boundary, true defect 1.02δ
False-certification rate
α = 0.5
α = 0.2
α = 0.05
SymCert
Bootstrap
Sample size N
e Data-selected generator, nominal 0.80
Coverage of the upper bound
Sample size N
Data-selected generator, nominal 0.95
Sample size N
Van der Pol
Duffing
Lotka-Volterra
Sel'kov
Bootstrap, noise 0.5
Bootstrap, noise 0.2
